Description

Connect this to that when an 18-pin FPC connector is needed. This 50mm long cable is made of a flexible PCB. It's A-B style which means that pin one on one side will match with pin one on the other side. How handy!

We're stocking this to fit with our EYESPI-compatible boards, but you could, of course, use it for anything that needs a 0.5mm pitch FPC.

New Products 5/11/2022 Featuring Mini Traffic Light - 6.5cm tall!
